Challenging Word Problems is a series of six books, specially written to supplement Singapore's Primary Mathematics textbooks for use in the USA. This Primary Mathematics series has been updated to align with the Common Core State Standards for mathematics.

With extensive graded questions for students of mixed abilities as well as higher-order questions for better math students, these topical problem-solving books serve to enhance students' mathematical reasoning and bolster their confidence

Each book in the series features the following:

- \* Graded Worked Examples
- \* Practice Questions
- \* Challenging Problems
- \* Review Questions
- \* Worked Solutions to All Questions

Through regular practice and review, the Primary Mathematics (Common Core Edition) Challenging Word Problems series serves to build a solid foundation in elementary mathematics and boost students' creative and critical problem-solving skills.

Challenging Word Problems, distributed by Singaporemath.com, is a wallet-friendly math series that equips elementary math students, teachers, and parents with the mathematical problem-solving skills needed to solve brain-unfriendly math questions, which are often used to separate the nerd from the herd, or which appear in school exams and math contests.

Fantastic set of difficult problems to ensure mastery

By avom

This series is a challenging set of problems (not all are actually word problems) organized by topic. Each topic has two sets of problems: One that is practice and a second set of challenging questions. Excellent selection that will enable mastery of the topics. No more endless busywork problems like most other workbooks.

1 of 1 people found the following review helpful.

Highly recommended!

By shelly

My son is almost 7 and this book is a great supplement to what he learns at school. I am a firm believer of challenging kids in a positive way!!

Good practice, Strange topics

By Desiree Preston

I like the challenge this gives my first grader and the extra practice in word problems. However, the problems are a little strange. Several in the first section involved animals dying, which seems not only morbid, but a little age inappropriate. For example, one problem was about fish in an aquarium dying. Another discussed duck eggs not hatching and a third described caterpillars that do not survive to become butterflies. Luckily, my son just thought those were strange topics for word problems, as I did.
