By downloading and install *Critical Social Psychology: An Introduction By Brendan Gough, Majella McFadden*, you have actually taken the right way to select the convenience one, as compared to the hassle one.

## Review

'The problem with most texts so far in this field is that they are written in a jargon-laden way, assuming theoretical starting points that many just do not understand. These authors keep their eye firmly on a student audience unfamiliar with these issues, accessibly covering the debates surrounding traditional social and critical social psychology by deliberately reproducing the format of a traditional social psychology textbook, and tracking the issues and debates from mainstream work as they introduce critical ideas.' - Professor Ian Parker, Manchester Metropolitan University 'I am very impressed. By offering a synthesis in a clear and accessible style it is doing something many of the other available texts do not...A refreshing change... [It] makes excellent use of engaging and relevant everyday examples while simultaneously reviewing an impressive range of literature and citing the most salient research.' - Susan Lea, Teaching Fellow and Associate Head of Psychology, University of Plymouth

Critical Social Psychology introduces students, in a straightforward, practical and accessible way, to key themes and debates arising from this burgeoning - and often complex - field. The authors contrast mainstream experimental and critical understandings of various social psychological topics and bring together a range of critical work in contemporary social psychology situating the discipline and its subject - the individual - firmly within society. Difficult concepts such as 'discourse', 'social constructionism' and 'subjectivity' are clearly described and illustrated with reference to contemporary research in areas such as gender, race, prejudice and conformity. In their review of 'classic' social psychology topics from a critical perspective, the authors use many research examples to facilitate student understanding of complex concepts and debates and to encourage critical reflection.
