EPEE 2.5: THE NEW PARADIGM REVISED AND AUGMENTED BY JOHAN HARMENBERG PDF

Johan Harmenberg revolutionized epee fencing when he pioneered the New Fencing Paradigm that lets a fencer neutralize his opponent's superior technique. In this new, expanded edition of Epee 2.0, he hears comments from top competitors and gives his responses. The result is a book that covers the development of epee fencing from the 1970s to the present. Johan had given up on serious fencing because he thought he lacked the talent to fence classically. He left his native Sweden to pursue his education at MIT. Here he met Eric Sollee, an innovative coach. Together, they mapped out the "New Fencing Paradigm, scribbling Eric's Three Conjectures on a bar napkin. Johan put the New Paradigm into effect – with a vengeance. Despite being snubbed by the Swedish authorities for his new style, he won the World Championship in Men's Individual Epee in 1977 and the Olympic Gold Medal in 1980. In this ground-breaking book, Johan tells his inspiring story and reveals the theory behind his style. Also, Björne Vaggö, NCAA epee champion and Olympic Silver Medalist, explains his own take on the New Paradigm, Geoff Pingree, IFA epee champion, tells how the paradigm developed at MIT. In this new edition, new voices join the conversation: world and Olympic individual champions Arndt Schmitt (Germany) and Philippe Boisse (France) plus Swiss national coach and world team champion Angelo Mazzoni. They share their winning methods, their insights, and their comments on Johan's theories, and he replies to their comments. He has also added new chapters, including a scientific paper on a study that put his ideas to the test.

Personal insights into a significant change in a sport....

By A. L. Evans

If you have read "Epee 2.0" you might not need to purchase "Epee 2.5". There is new material in "Epee 2.5", but I didn't feel that it substantially changed impact of the original book, or provided substantially more information than "Epee 2.0" did. It was interesting to read some of the additional commentary, and the use of a few YouTube links in the text was a nice surprise and helpful.

OI will say that the book is rather poorly set out, with a few small sections of the typography (in my copy, the picture captions specifically) being almost unreadable. Fonts change for no reason, and so forth. It's distracting, but doesn't significantly reduce the information in the book.

Don't purchase the book for a huge insight into tactical epee fencing. The idea of removing the opponent's pre-requisites to score and forcing the opponent into yours is now universal among good coaches and has been for some time, though I think Harmenberg does a nice job of explaining how this concept -- radical at the time -- worked for him (and, as an aside, one of the strengths of the book is Haremborg's insights into his own processes as an high level athlete).

What was most interesting to me was that this book discusses the evolution of a new, modern style in epee from a very personal point of view. As fencers, we don't document the changes in our sport very well, or engage in the sort of "style analysis" so common in professional sports, so this was a welcome re-read for me.

I know some people have told me that "Epee 2.0" and "Epee 2.5" are the definitive works on modern epee. I would disagree, and argue that such a book has yet to be written.

A "Book of Five Rings" for our time

By Michael Mcdaniel

If you're an epee fencer, you need to read this book. If you're NOT an epee fencer, you STILL need to read this book. In many ways, it's reminiscent of Musashi's "Book of Five Rings" - not so much a book on tactics and the mechanics of fencing as a work on strategy. Dr. Harmenberg lays out a fundamental principle of strategy, as applicable to grand strategy as to the fencing strip - that victory comes to the side that is best able to force the fight into conditions that favor them. Manipulation of the opponent is as important as excellent execution of technique.

A word of warning, though...Harmenberg himself writes that this is not a book geared to the novice fencer. He stresses that a novice needs to lay a good foundation, and be competent in all aspects of fencing, before selecting a few techniques to hone to lightning-quick perfection.
