Great practice book

By Jackie A.

I like the Go Math series. My older one, who is now in high school used the same series, and now it's his little brother's turn. This is just a practice book; the kids cut them up and bring them home for weekly homework. I got the practice book for 1st graders last year, and it was a big help. There are no lessons here, only activities kids can do. So if you are unfamiliar with models and different methods of calculation, youtube will be your bestfriend.
