The central reality of these early 21st Century times is the total certainty of imminent, massive, deep-rooted change in every sphere of reality that is meaningful to the human race. This change will not be long in arriving, not at all, indeed, we are already being buffeted by the first, outlying squalls of the rapidly approaching level-five hurricane that will soon be upon us with the full force of its fury. This easy to read compact Briefing Book is specifically structured to serve as a concise and time saving introduction to the topics at hand. It is accordingly intended for the many millions of people who have come to the realization that: "Hey! Something is going on! Kansas is going bye-bye!" Well, yes it is, the world as you have known it is going away as surely as Dorothy's Kansas went away in the classic movie, The Wizard of Oz. The unsettling news is that you are about to be abruptly thrown into the deep end of the swimming pool, without any advance notice or prior preparation on your part. As you look around yourself, with a rising sense of panic, you have somehow managed to stumble upon my little Briefing Book, and it will serve you as a sort of compass and miniature life raft. By itself, it won't save you, and it's frankly not intended to do that, because in the end, the stark reality is that you have to save yourself. But it might just help you to make sense of what is happening, enough to get your mental bearings and straighten out your thinking, so that you can make more intelligent judgments that enhance your prospects for not just surviving, but possibly even flourishing in the midst of what is about to transpire on this world.

Paranoia Guide Book

By Kaydars

At least that's what it looks like at a glance. Read cover to cover it doesn't make much sense, but that's because, like the title says, it's a briefing paper, containing a collection of BRIEF articles on a variety of subjects. These articles, to a casual observer, and at a glance, appear to be a little nutso/paranoid/loopy - that sort of thing. But stop and take a while to stew on what Richard says, look at the world around you, and something scary starts to happen: his articles start to make sense. In fact they don't STOP making sense.

I loved this book. It is a great summary of a lot of related subjects of what is REALLY going on in this world. I wish it had better coverage and distribution. It is definitely a MUST READ, even if what he says seems a little hard to believe at first. Science and history are full of truths that were initially hard to swallow, but which are established and accepted facts today. This is one of those books.

Thank you Mr Sauder for sharing this priceless treasure with us!

Not So Much

By DojoDiva

Sauder previously presented a reasoned and well-written presentation of some out-there ideas in his book on underground bases and tunnels. The Briefing, however, is just that: brief. And not so coherent. This title is more like a book outline and needs some serious fleshing out. He may be right, but this effort does not convince.
